DESCRIPTION:

The Model DFA is for mounting in finished drywall or plaster ceilings to accept any standard lay-in type diffuser.

It allows the retrofit of lay-in diffusers and simplified installation of flexible duct in surface mount applications.

Model DFA is installed quickly and easily and is suitable for variable ceiling thicknesses. Installation requires framing of the opening with "C" channel or wood for attachment with mounting screws (by others).

The finished appearance is professional and aesthetically pleasing.

Model DFA simplifies and reduces installation time compared with surface mount type diffusers.

A major benefit is that the diffuser allows ceiling access for maintenance purposes in lieu of separate access doors.

Material: Aluminum extrusion with staked and mitered corners.

Standard Finish: AW Appliance White.
